

Press Release 2019-06-05  
Absolent Group AB

## **Absolent Group subsidiary Filtermist acquires Carter Environmental Engineers Ltd's (CEE) air services division assets**

**Telford based industrial air filtration specialist Filtermist International Ltd has finalised a deal to purchase the assets of Carter Environmental Engineers Ltd's (CEE) air services division.**

The acquisition includes the rights to manufacture the Carter range of dust extraction equipment which consists of dry dust filters, booths and benches, and wet collectors.

*“Dust extraction is a huge growth area for our business. We acquired Dustcheck Ltd, which manufactures process and venting filters used in a variety of industries, back in 2017. We also own three companies that all offer a full turnkey dust extraction systems service. Carter wet collectors are well-known within the industry and we are confident that they will perfectly complement our existing product range. Our systems companies Cades Ltd, DCS Ltd and Multi-Fan Systems currently source wet collectors from external suppliers; having this resource in-house will significantly bolster our offering for customers.”* explains Filtermist International CEO, James Stansfield.

The asset purchase is of a smaller character and is not expected to have any significant impact on the earnings per share.
